

INFUSION SERVICES

Penn Highlands Healthcare

Infusion services are offered to patients requiring intravenous (IV) medications to treat their conditions. Each of our Penn Highlands locations offer infusion services in private, comfortable rooms featuring state-of-the-art equipment and infusion pumps. Our medical team works together to coordinate care that is personal, effective and convenient.

Here are some of the conditions we treat:

- Anemia

- Neupogen
- Prolia
- Rabies vaccine
- Reclast
- Remicade
- Rituxan
- Solumedrol
- Venofer
- Xolair

What to expect during your visit:

- Your visit may range from 30 minutes to six hours, depending on your type of infusion and your individual needs.
- Feel free to bring books, needlework, a laptop, a music player or handheld games to help pass the time. We offer free WiFi but ask that you please use earphones.

- Please dress comfortably. Wear a shirt that allows the nurse to easily access your arm, where infusions are usually administered.
- You may wish to bring a blanket or other items to keep yourself comfortable.
- Please do not wear perfume, cologne or other fragrance.
- Bring any questions you may have, along with a notepad for jotting down information.
- When scheduling your appointment, we will let you know if you'll require someone else to drive you home.
